

The Best Wheat and Mixed Farming Lands in Alberta

VOL. II NO. 52

CHINOOK, ALBERTA, APR. 20, 1916

Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

EASTERTIDE !

Breezelets

A miss is as good as a mile—
a lot better for kissing purposes.

Germany denied sinking the Persia. Austria denied sinking the Persia, and now Turkey has denied sinking the Persia.

You're next, Bulgaria.

After the daughter "comes out" the bills begin to come in.

Villa's capture is only a matter of time. One of these days he is liable to be overtaken by old age, you know.

One way to get poor quick is to invest in quick-rich schemes.

The following advertisement appeared in one of our exchanges: "Wanted: Girl; farmhouse; last lived two years."

It is evident from his speed that Villa doesn't loiter along the way, to read all that the American paper have to say about him.

A native uprising is reported in Cochín, China.

And it probably doesn't refer to the flying of the famous hens, either.

"Greece has new trouble on its hand" is the latest report.

It looks as though the Greece is in the fire.

The fat's been frizzling for some time—and any moment may be out of the frying pan into the fire

And Greece become a grease spot only on the map in the Balkan States.

Possibly the reason there is a price on Villa's head is because that is really all that is wanted of him.

But Villa must prolong the chase and save his head for some time yet, so as to give the Huns their money's worth.

And eventually Villa may turn up in Germany, with the "Made in Germany" label attached.

Is a long advance being anticipated in the order for 10,000,000 pairs of shoes for the allies?

Political straw votes show which way the papers want the winds to blow.

An Unusual Runaway !

STEERS "TAKE FRIGHT" AND SKIDDO !

On Saturday afternoon, about 6.30, an unusual runaway occurred. Two mild-eyed looking steers, hitched up to a wagon, stood outside of the stores, quietly chewing their cud—or gum ! Whether they were startled by so many autos buzzing to and fro, or whether they considered their owner had gossiped enough, or whether they had had nothing to eat or drink since breakfast, will never be known. Suffice it to say, that suddenly, with a startled bellow and their tails switching the air—or flies, they started off at a good pace northward, and as they went their pace increased, a pace that would have done credit to Tom Longboat when making some of his wonderful pacing records. On they came ! The bumps at the crossings only increased their frantic efforts to get home—it must have been their dinner they were after. At this critical juncture, one of our brave citizens all of a "sudden" waltzed into the road in front of the runaways. This had an hypnotic effect upon the animals, which stopped instantly, although somewhat restless for a few minutes. In the meantime, the owner of the animals came along to where he had left them, when, lo, presto, they had skidded, vanished ! Presently, catching sight of the wanderers he wasn't long before he regained possession of them again.

A Prairie Fire

THAT MIGHT HAVE HAD VERY DISASTROUS RESULTS

MORE CARE NEEDED

A prairie fire broke out some six miles north-east of Chinook on Sunday afternoon, that very quickly assumed dangerous proportions, spreading out some two or three miles, being fanned by the strong wind from the west. It gave some fifty farmers and others a very strenuous time in stamping out the fire. It is reported that two bins and contents were destroyed, and had it not been for the prompt work of the fire-fighters there is no telling what might have been the results. The origin of the fire is attributed to a children's bonfire, or to two passing horsemen.

CLEAN-UP DAY !

A TIME SHOULD BE SET FOR CHINOOK

Canadian conditions make a clean-up in spring a necessity. Owing to the cold weather, and the abundance of snow, sanitary conditions are not at their best. Lanes and alley-way become littered with garbage, ashes and waste-paper; backyards, cellars and store rooms harbour refuse which is both useless and dangerous. With the melting of the snow this accumulation is exposed to view, the thawing of garbage permits of speedy decay, and a very dangerous condition is at once established.

For the past two or three years Chinook has had a clean-up day and, we believe, a day will be set for one this year.

The success of a clean-up day depends entirely upon the citizens. Leaders are necessary to initiate the movement, to get the proper officials interested, and to awaken a public interest.

Sufficient cartage facilities should be provided for the removal of the refuse collected, and places furnished for its disposal or destruction, and every encouragement given for the voluntary efforts of citizens to make their home town more cleanly, more healthful and more homelike.

Swat That Fly !

DON'T SPARE HIM—HE WON'T SPARE YOUR CHILD

This little animal is showing as great an activity as ever in any place where it was not exterminated last fall, or where its eggs were allowed to remain under the protection of the attic or recesses or crevices.

It is therefore in the line of public good for everyone to take a hand early in the annual campaign of extermination.

All persons who plan to have a garden around their house or near their house should take the trouble to get a little mixture of borax and hellebore and spread it in any barn fertilizer that they may buy, for fertilizer that is not so treated is the greatest known propagator of flies, greater even than the uncovered can used for garbage.

Kill the fly, but above all, put an end to conditions that encourage the fly to live.

Chinook Breezes

Good Friday.

Easter Sunday.

Easter Hats.

Hens are working overtime to keep up the Easter supply of eggs.

The hour of the evening service in the Chinook church has been changed from 7 to 7.30.

A special Easter service will be held in the Church on Sunday evening next.

Mr. and Mrs. Maxwell will be out at the homestead for the next six months. Mr. Maxwell has leased the lively barn to R. A. Morin till his return.

Will Soon Be in the Trenches

Arthur Yeo, of the 89th O. S. Batt. is in town. The 89th will be over in England sometime this summer.

Sure will be Appreciated

Over 600 feet of new sidewalk is to be laid this year by the village council, the work on which will be commenced at an early date.

Just Waiting for a House

Mrs. R. S. Woodruff of Youngstown was in Chinook last week. The family will reside here permanently as soon as a suitable house is vacant.

Sour Grapes

Several new autos are seen on the streets these days. In fact, autos are getting so common around town that we have decided not to buy one—haven't got the "bucks," dountcherknow !

Hops He Gots It

C. S. Belden of Chinook spent a few days in town recently. Mr. Belden has entered into the News-Telegram contest and is trying hard to win the automobile to be given away by that paper—Stanmore correspondent to Hanna Herald.

A Very Desirable Acquisition

It may not be generally known that Chinook will soon have a member of the Victorian Order of Nurses residing in town. Arrangements are almost completed towards that desirable end. The board of trade have matter in hand. More particulars later.

A Great Improvement

The Banner Hardware Co. are greatly improving and enlarging the interior of their store by taking out all the partitions and putting the tin shop in the store room at the back. When completed it will make one of the largest hardware stores along this line.

Watch It !

OR CONSEQUENCES MAY PROVE DISASTROUS

An incipient fire was started in town on Monday morning, during the high wind, that might have proved disastrous had it not been noticed in time. A neighbor was burning up some refuse, when the fire got away from them, and rapidly spreading along the dry grass towards one of the residences, but fortunately was just noticed in time by another neighbor who promptly extinguished the flames. It is not safe to start a fire and leave it, however calm the atmosphere may be at the time of starting the fire. It pays every time to be cautious, and to be SURE the fire is out before leaving it.

Can You Say "Yes ?"

EDUCATION ISN'T COMPLETE IF NOT

According to a professor of one of our colleges a man, to be educated in the true sense of the word must be able to answer the following list of questions in the affirmative:

Anyone who can answer "yes" without stretching his conscience is really educated whether he has seen the inside of a college or not.

Has education made you public-spirited?

Has it made you a brother to the weak?

Have you learned how to make friends and keep them?

Do you know what it is to be a friend yourself?

Can you be high-minded and happy in the meanest drudgeries of life?

Do you think washing dishes and hoeing corn just as compatible as piano playing and golf?

Are you good for anything yourself?

Can you be happy alone?

Can you look out on the world and see anything except dollars and cents?

Can you look into a mud puddle by the wayside and see a clear sky?

Can you see anything in the puddle but mud?

Can you look into the sky at night and see beyond the stars?

Salt in oven under baking tins will prevent their scorching on the bottom.

Lost All

WHEN HIS SHACK BURNS

On Monday morning, about 10 o'clock, Kaoul Coderre, who resides on the whf 3-28 8, about two miles from Coltholme post office, had the misfortune to lose his shack by fire. Mr. Coderre was discing some distance from the house, and was not aware of the fire until his attention was attracted by J. W. Sellers, who happened to be in the neighborhood, looking for stray horses. When the two opened the door the room was full of smoke which burst into flames as soon as the draught was admitted, and the building and contents were totally destroyed. Besides losing his clothing, &c., Mr. Coderre claims to have lost \$500.00 in notes. The origin of the fire is supposed to have been caused by falling cinders from the stove, as a burning hole was noticed in front of stove when the door was opened.

Road Coming West

MAY SOON BE DONE

For some time there has been an agitation to get a better road coming into town from the west. Recently Councillor Dobson of the R. M. of Sounding Creek, wrote to J. A. McColl, M. P. P., our representative, in the local legislature, regarding this road, and the following reply has been received from Mr. McColl:

Edmonton, April 14, 1916
Robert Dobson, Esq.,
Chinook, Alta.

Dear Sir,

I am in receipt of your favor of the 12th inst. In connection with the work you refer to west of Chinook, I may say that if there is any Government money forthcoming at all this year, this piece of work will be done, and you can arrange to have the grading done by your municipality or by any other means that you see fit. I want to work in co-operation with the Council as much as possible, and I am sure that we will do all that is possible to have as good a job on this particular piece of work as we can.

Yours very truly,

J. A. Coll

If this work is done it will connect with the graded road north from the west corner of section 4-28-7, and will be a great convenience to farmers using this piece of road.

AMERICAN PAPERS NOT AFRAID TALK OF CANADA'S PROSPERITY

SOME ASTOUNDING FIGURES ARE PRESENTED

Chicago Herald Gives Some Particulars About the Remarkable Development of This Country Within Recent Years, and Tells How Canada is Coming Into Her Own

In connection with the opening of the Chicago Herald's industrial exhibition, in the Ashland building, corner North Clark and Marshall streets, a recent edition of this paper had the following to say about the prosperity in Canada:

"When Canada closed her books for 1915 she found her farmers prospering beyond expectations, her industrial plants running overtime, her natural resources pouring out wealth from hitherto undeveloped sources, and her railroads showing the greatest net earnings in their history."

"From two items alone Canada added \$900,000,000 in new wealth during the year, and over 70 per cent of it was accumulated during the last six months. Her crops returned over \$400,000,000 and her industries over \$500,000,000. Her exports to the United States in one year increased \$100,000,000, and her imports decreased \$74,504,504."

"These astounding figures in themselves demonstrate to what an extent Canada is coming into her own. Canada has built up her foundations. Her bank deposits at the close of 1915 increased over \$80,000,000."

"Important as her industrial growth has proved to be, the Canadian did not neglect her rich farm territory, knowing that upon their development depends her growth. No country wrote a brighter page of history in agriculture in 1915 than Canada, but an extraordinary combination of circumstances, the like of which the American continent may never see again, is partly responsible for her success. She was called upon to supply foodstuffs for Great Britain, her allies, and for her soldiers at the front, and the necessity brought corresponding effort. She has a new and fertile soil, and the weather conditions of the year were ideal. Her government's policy of encouraging the raising of choice grain was never more effective."

"This combination gave the Dominion farmer a consumption of his produce, 'Two in one yield.' Nearly a million bushels of grain were produced, and, of this, 338,258,000 were in wheat, Alberta, Saskatchewan, and Manitoba grew 294,000,000, the remaining 33,858,000 bushels coming from British Columbia, Ontario, Quebec and the Maritime Provinces. The farms of Alberta averaged 36.16 bushels per acre, those of Saskatchewan 28.72 and those of Manitoba 25.72."

"This great harvest brought money to the prairie producers, and brought it with a rush. Up to November 1, the Canadian West had received \$32,000,000 for its consignment of wheat."

"Canada's present prosperity, however, does not depend upon wheat. She is working overtime in her factories and mines. At the time of the outbreak of the war, the steel works of Quebec, employing 300 men, was the only plant engaged in the making of war munitions. In 1915, 100,000 tons of steel were produced in the Dominion cities throughout the Dominion are engaged in the making of war supplies."

Mr. Wilkinson, the architect, had been invited down to the 'clerk' to display the plans of the new house to some guests.

"Here is the front elevation," explained the architect, "and the plans on the library table in the inspection of the visitors, 'with the outside window and the inside window, this is the east elevation, showing the tower.'"

"After various comments had been made by the guests, Mr. Arthur, aged seven, who was enormously interested in the new house, cried:

"And where are the two mortgages father said he was going to put on?"

The Price For Poppy Heads
In view of the steps being taken in this country to restrict the sale of laudanum, it may be noted that, according to the report of 1914, the white variety of the opium poppy is still grown in several parts of England, notably in Lincolnshire. The crop is always a precarious one, but there is a steady market for the poppy heads. Belgium used to export a proportion of the heads used in this country, but not sufficient for the loss of her crop to cause serious shortage this year. The price paid for poppy heads is 12c to 15c per 1,000 for large size, and 8c to 10c for medium.

Live Stock Values
The census and statistics office, Ottawa, places the average value of horses in Ontario at \$125; in Quebec, \$100; in New Brunswick, \$80; in Nova Scotia, \$70; in Prince Edward Island, the average value of the heads used in this country, but not sufficient for the loss of her crop to cause serious shortage this year. The price paid for poppy heads is 12c to 15c per 1,000 for large size, and 8c to 10c for medium.

Too Moderate
"Your husband a heavy smoker?" "Dear me, no. You're no idea how long it takes me to buy enough coupons from his cigars to save a cut glass pickle dish."

The Surest Sign
"The Greens are going to have a party tonight!" "How do you know, I've invited?" "No, Mrs. Green was over to borrow our silverware."

The Usual Talk
"Say, old man," quoted the farmer, "I wish you'd train my son to be a lawyer in your office. There's nothing in farming."

"I'll do you," assented the lawyer, "provided you'll take my son on your farm. There's nothing in the law."

Explosives From Canadian Capital To be Replanned

Process by Which Artificial Substance For Nitrate is Obtained

The process of withdrawing nitrogen from the air for use in manufacturing artificial fertilizers and high explosive may be seen in operation at the new \$2,000,000 horsepower plant at Odessa, in Norway.

The separation of the nitrogen from the oxygen in the air is accomplished by compressing the air into liquid form. The nitrogen, which boils first, at about 320 degrees below zero (Fahrenheit), is separated by passing through a series of heat exchangers, which boils at about 295 below, is utilized on account of its intensely low temperature, to assist in the liquefaction process. Ultimately it escapes into the air again.

The nitrogen gathered in this manner is put into form for use by compressing it into a liquid state. The liquid is then pumped to practically every automobile engine to its offensive effect. The liquid is then pumped to practically every automobile engine to its offensive effect. The liquid is then pumped to practically every automobile engine to its offensive effect.

The power for the gigantic Odessa plant is furnished by the nearby river. The liquid is then pumped to practically every automobile engine to its offensive effect. The liquid is then pumped to practically every automobile engine to its offensive effect. The liquid is then pumped to practically every automobile engine to its offensive effect.

Meanwhile the production of the plant is being pursued in another department. Air for the purpose is drawn in great inlet pipes from the mountain tops. This was done because the air in the valley around the great works was found to be full of acetylene gas, which is highly explosive.

The nitrogen from the liquefaction plant is turned into cylinders filled with powdered carbide, which is used in the production of artificial fertilizers and high explosive.

Money-Making Devices

Many New and Clever Devices in Use as a Result of the War

Not since the great cycle boom a quarter of a century ago have so many inventors made more money on patented devices than during the present war.

One of the fortunate inventors of the modern hand grenade, used so often in trench fighting, is reported to have netted over \$1,000,000 in royalties. The inventor of the Garfield machine gun, which has been used by the United States army, is reported to have netted over \$1,000,000 in royalties.

The inventor of the "Bers" periscope trench rifle, with which the Australians are equipped, is reported to have netted over \$1,000,000 in royalties. The inventor of the "Bers" periscope trench rifle, with which the Australians are equipped, is reported to have netted over \$1,000,000 in royalties.

The inventor of the "Bers" periscope trench rifle, with which the Australians are equipped, is reported to have netted over \$1,000,000 in royalties. The inventor of the "Bers" periscope trench rifle, with which the Australians are equipped, is reported to have netted over \$1,000,000 in royalties.

The inventor of the "Bers" periscope trench rifle, with which the Australians are equipped, is reported to have netted over \$1,000,000 in royalties. SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole land of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Land Agency (but not Sub-Agency), on certain conditions.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required, except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six months' residence in each of six years after entering homestead patent; also 20 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate 20 acres and erect a house worth \$300.00.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

Miss Florence L. White

Certificated at Trinity College,
London, England
Will be in Chinook every Tuesday to
give Lessons in

Piano, Organ, Violin, Mandolin,
Bando and Singing

Open for Engagements as Pianist at
Concerts and Dances.

For terms and further particulars
apply to Miss White.

In Tuesday's casualty list we noticed the following: "No. 79450 Harry Wm. Falk, kin at Youngstown, Alta."

The ladies' aid of the Chinook Methodist church will hold an Egg Social in the church on Friday, April 21st. A good program and a pleasant evening.

Mr. J. W. Crockett, Jeweller and Optician, of Cereal, will visit Chinook every Saturday, at the old drug store. Repair work will receive prompt attention. Eyes tested free.

VERY SAD DEATH

We are sorry to announce the death of Mrs. Lawrence, beloved wife of J. W. Lawrence, Chinook, which sad event occurred at the home town of the deceased, Thornbury, Ont. The deceased had only been married some three months, and was full of happy anticipations of returning with her husband to make her home in the West, but a higher Power willed it otherwise, putting an end forever to all her earthly hopes and that of her bereaved husband. The greatest sympathy is felt for sorrowing ones.

M. L. CHAPMAN

Chinook, Alta.

GENERAL DRAYING

All orders promptly attended to
Office: Opp. Crown Lumber yard

Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, and this must be a comforting thought for those upon whom the heavy burden of directing the Empire's affairs has been laid. Gain or no gain the course before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—HON. MARTIN BURRELL, Minister of Agriculture.

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all that he can, to work doubly hard while our soldiers are in the trenches, in order that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. 'Work and Save' is a good motto for War-time."—SIR THOMAS WHITE, Minister of Finance.

THE CALL OF EMPIRE COMES AGAIN IN 1916

TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,
BEEF, PORK, BACON,
CHEESE, EGGS, BUTTER, POULTRY,

CANNED FRUITS, FRUIT JAMS,
SUGAR, HONEY, WOOL, FLAX FIBRE,
BEANS, PEAS, DRIED VEGETABLES

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.

THE GOVERNMENT OF CANADA

THE DEPARTMENT OF AGRICULTURE

THE DEPARTMENT OF FINANCE

Here is the guaranteed paint, the supreme paint achievement of Canada.

It ought to be your paint this season. Get acquainted with the label, which is always white and gold on black.

B-H

Every ounce of every pound, of all the white base in every can of B-H "ENGLISH" PAINT contains:

70% of Brandram's B.B. Genuine White Lead, and 30% Pure Oxide of Zinc

This proportion is absolutely uniform always.

B. B. Genuine White Lead makes B-H "ENGLISH" PAINT the "sure-pure" paint, giving an increased covering capacity and vital enduring and protective power.

Buy B-H "ENGLISH" PAINT from us. We carry a good assortment. Don't waste time and money on unguaranteed brands. The makers and agents stand behind every can of B-H "English" Paint.

Don't buy until you have found out all about this paint. "Made to Endure" is the title of our B-H "ENGLISH" Paint Booklet; given away for the asking.

We have a copy for you, also complete B-H color folders.

We have a lot more to say about B-H "English" Paint. Read our later announcements.

THE VOGUE OF JERSEY

A Sports Suit of Heavier Weave

THERE is absolutely no questioning of the fact that jersey weaves predominate in the new fabrics for spring. "I don't like the slimy old stuff," you will hear many a woman say who remembers the time—some decades ago—when jersey was very much in vogue. She forgets that wonderful things have happened to machinery since then, so that the jersey weaves of today are a very different proposition. Designers have taken up this material for sports wear particularly, and more daring ones have used it to advantage for more formal wear.

Thus you have jersey suits, coats, blouses, sweater coats, dresses and jersey, or, as it is called, "la jersz" silk underwear. There is a new serge out, too, called tricot, which is a serge with a soft jersey weave. Of course the feature about jersey weaves of all sorts is the great elasticity and consequent adaptability. Jersey does seem, however, an anachronism in this day of bouffant skirts and flare generally; but that is but another proof that Fashion asks no credentials if a style pleases her.

The two suits pictured—one in light-weight jersey weave and the other heavier—show that the new jersey materials lend themselves admirably to tailoring and keep a fair semblance of shapeliness. The light-blue suit is a pretty model for early summer or even for sports wear, but is not to be suggested for the woman with a limited wardrobe. The dark-blue suit may take the place of the sports or walking suit which forms part of every woman's spring wardrobe. Both show yoke, belt and pockets in the coat and plain gored skirt.

A very smart sports costume is made from the white jersey silk. It is a "slip-on" style, the sweater jacket part going over the head. One may wear

The Popular Material in More Formal Gown

Ribbon Trims "La Jersz" Silk

it with a silk blouse, or a chemisette would answer the purpose. A black varnished ribbon binds the jacket and revers and belt. This ribbon is supposed to suggest the patent leather trimming and carries out the scheme of things glossy, which is a big fashion feature at present.

The green frock shows how the jersey weave may be manipulated into a real frock. While there is nothing very startling about this dress, nor any particular reason why jersey should have been chosen for its development, it is, nevertheless, something that many women will want who pride themselves on their acceptance of everything new. Notice the cape stiffened to collar height. It is lined daringly with yellow silk.

A true sports dress that allows for unhampered movement on the part of the hockey or golf player or roller skater is of the brilliant yellow jersey cloth. Bronzed kid for vest, belt and cuffs gives it a stylish touch.

The 1917 Good Roads Congress

Advisory Board, composed of Past Presidents of the Association, to be created.

Winipeg was selected as the place of meeting for the 1917 convention of the Canadian and International Good Roads Congress at the annual meeting of the Dominion Good Roads Association held in Montreal.

Officers for the ensuing year, elected, are:
D. Duchesne of Montreux, Ontario, president; S. L. Squire, Toronto, vice-president; George A. McNamee, Montreal, secretary-treasurer.

It was decided to create an advisory board, which will be composed of the past presidents of the association, as follows:
W. A. MacLean, deputy minister of highways, Ontario, Toronto; C. H. Dandran, Montreal; B. B. Bicknell, deputy minister of roads, Quebec; and O. Hertzweide, Toronto.

The executive of the association will be composed of: E. C. Cunningham, Leithbridge; C. Bennett, Winnipeg; Howard W. Pillow, Montreal; J. A. Sanderson, Oxford Station, Ontario; Thomas Adams, Ottawa; E. N. Desaulniers, M.P.P., Chambly; W. A. Levesque, M.P.P., Montreal; George Hamilton, Toronto; and A. F. MacCallum, Hamilton.

Something in That
John—Just one more kiss, darling, before we say goodbye.
Mabel—Oh, John, you've had enough—wait till tomorrow night.
John—Mabel's are waiting for tomorrow night may be dead, or you may have been eating onions.

MORE THAN EVER

Increases Capacity For Work

Many former tea and coffee drinkers who have found it more difficult to perform day after day, have found a better capacity and greater endurance by using Postum. A woman writes:
"I had drunk coffee for about twenty years, and finally had what the doctor called 'coffee brain.' I was nervous and extremely despondent; had little mental or physical strength left; had kidney trouble and constipation." (Tea is just as injurious because it contains caffeine, the same drug found in coffee).

"The first noticeable benefit which followed the change from coffee to Postum was the improved action of the kidneys and bowels. In two weeks my heart action was greatly improved and my nerves steadier."

"Then I became less despondent, and the desire to be active again showed proof of renewed physical and mental strength."

"I formerly did mental work and had to give up on account of coffee, but since using Postum I am doing hard mental labor with less fatigue. Name given by Canadian Postum Co., Windsor, Ont."

Postum comes in two forms:
Postum Cereal—the original form—must be well boiled, 15c and 25c packages.
Instant Postum—a soluble powder—dissolves quickly in a cup of hot water, and, with cream and sugar, makes a delicious beverage instantly, 30c and 50c tins.

Both forms are equally delicious and cost about the same per cup.
"There's a Reason for Postum."
—sold by Grocers.

Prisoners of War In Germany

Treatment Accorded British Prisoners in German Camps

One hears many contradictory reports of the life of the prisoners of war in Germany, and it is hard to know how much of the good one hears is due to the fact of the restriction and how much to the locality in which the prisoners are confined. "La Saxony," one report says, "where we have proved consistently foes on the battlefield, conditions are as good as can be expected, but in the north, in Prussia, the lack of civility and neglect would be unbelievable if it were not true."

Of the petty and continuous insults received, apart from the real deprivations, one exchanged prisoner writes:

"My letters arrived with stamps on them, they were never delivered till the stamps bearing the king's head were solemnly and respectfully, in half. Petty, wasn't it? Then newspapers were distributed: full of all disasters, which they say were directly translated from English newspapers, but we just laughed and said: 'It's all a pack of lies, which made them stamp with rage. Sometimes French Prussian officers would march through the wards the other way, and when they were told this in English they'd say through their teeth, 'But the fool.' He went on, 'For the lack of it, was one of the worst things. We couldn't even make tea, as they couldn't give us honey and sugar. So we let the tap run until it was as hot as it would go and then made cocoa.'"

"But the food," he went on, "for the lack of it, was one of the worst things. We couldn't even make tea, as they couldn't give us honey and sugar. So we let the tap run until it was as hot as it would go and then made cocoa."

He Feels Like a Young Fellow

WHY MANITOBA MAN PRAISES DODD'S KIDNEY PILLS

After Experimenting With Other Medicines Max Hanjook Found Dodd's Kidney Pills the Cure That He Sought.

Pleasant Home, Man.—(Special).—Mr. Max Hanjook, a well known resident of this place, writes after an extended period of ill-health is feeling strong and hearty again, is spreading broadcast the good news that he found a new lease of youth in Dodd's Kidney Pills.

"I tried all kinds of other pills, but they didn't help me," says Mr. Hanjook. "But Dodd's Kidney Pills have made me feel like a different man. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

"I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again. I feel like a young fellow again."

Canadian Timber Comes Into Its Own

Large Users Decide on Its Use Exclusively in Construction Work

The decision of the various Dominion government departments and of the Canadian Pacific railway to use Canadian timber only, to the exclusion of imported timber, is a decided advantage to the timber industry of this country, and, therefore, marks a definite gain for the cause of conservation in Canada.

Southern pine, even in 1915, when Canada was at war and when there was a great increase in the consumption of lumber, was imported to the extent of 50,000,000 feet, having a value of over \$3,000,000. In previous years, very much larger quantities were imported despite an adverse trade balance for Canada and in the face of a supply in Canada of better timber at an equal or lower cost grown and manufactured entirely within the Dominion.

The Dominion government has in past years used many million feet of southern pine in various public works, but henceforth Canadian timber will be used to the exclusion of the foreign article. Douglas fir will replace southern pine in such works as Quebec and Montreal harbor improvements and Hudson Bay terminals.

Douglas fir has been used actively in the Toronto harbor works, as a timber was inserted in that contract calling for Canadian material. The action of Baron Stanger, in ruling that Canadian timber only shall be used in works of the Canadian Pacific railway, is a precedent that large private users are finding it consistent with present conditions to use Canadian products.

Other consumers (such as the Post Office, Canada, large and small, will follow the lead of the two largest users. Mechanical and engineering professions are also rapidly replacing southern pine by Douglas fir and the imported woods by the home grown product.—W. J. Van B.

If All Pled Out, Try This Prescription

When that overpowering weariness and a nerveless feeling come over you, it shows some serious disorder is undermining your health. The cure is simple. Build up the system and nourish the body back to health, and your wholesome blood.

The one sure means of doing this is with Dr. Hamilton's Pills. They are a marvelous aid to appetite—convert all you eat into nutriment and tissue-building material. They are supplied with new nerve fibre, hardy muscle and firm flesh. Lasting good health is sure to follow.

Really want to get well and stay well, use Dr. Hamilton's Pills, 25c per box at all druggists.

The man who waits for opportunity to knock finds the waiting good.

A Pill for Brain Workers.—The man who works with his brain is more liable to derangement of the digestive system than the man who works with his hands, because the one calls upon his nervous energy while the other applies only his muscular strength. Brain fog begets irregularities of the stomach and liver, and the best remedy that can be used is Dr. Hamilton's Vegetable Pills. They are specially compounded for such cases and all those who use them can certify to their superior power.

A young reporter who took his first check to the bank and was asked by the cashier to endorse it on the back, wrote: "I heartily endorse this check."

In the train of Alexander the Great during his Asiatic conquests were some observant persons who made notes of what they saw, when not too busy killing off the inhabitants, and in these written documents is told the story of "a race growing in India which produces human without heads." This singular case evidently was well known in that part of the world in 320 B.C.

An Island of Bones.—Alaska has her skeletons—not mere reminders of exploitation, but real bones. They are on the Pringle Island, an area of 100 miles, a mile wide and many feet deep. Secretary of Commerce Redfield points out their value as fertilizers, and if grain and transportation facilities can be found, here is an important material that will go a great way toward meeting our needs for phosphorus and nitrogen for the soil.

It seems that many generations of seals died on the coast of the Pringle Islands have laid up this reserve of fertilizer which has been discovered just at the time when we need it most. Despite the many surveys that have been made for fertilizing material a critical need is still to be met by the new discovery. The day of our starvation as the result of an impoverished and barren soil is thus pushed into the more remote future.—The Country Gentleman.

Family Affair.—"So my daughter has consented to become your wife. Have you fixed the day of the wedding?"
"I will leave that to her."
"Will you have a church or a private wedding?"
"After mother can decide that."
"What have you to live on?"
"I will leave that entirely to you, sir."

May Have to Charter Food Ships.—A letter from France says: "There is a serious shortage of food in France. The government has decided to charter food ships to bring her own food across the sea under protection of her own flag. The war continues much longer, is the opinion of many persons here."

The view is expressed that Germany's program at sea goes mean starvation of Switzerland unless some such action is taken.

The Grain Growers' Guide says that Western Canada cannot, in view of the scarcity of help and the small amount of fall plowing done, hope to produce in 1916 anything like the crop of 1915.

CHAPPED HANDS AND COLD SORES

Are your hands chapped, cracked, or sore? Have you "cold cracks" which open and bleed when the skin is drawn tight? Have you a cold sore, frost bite, or chilblains, which at times makes it agony for you to go about your duties? If so, Zam-Buk will give you relief, and will heal the most damaged skin.

Miss B. Stojan, of East Haverford, N.S., writes: "My hands were so badly chapped it was impossible to put them in water. All remedies failed to heal until I tried Zam-Buk. Perseverance with this balm completely healed the sores."

Zam-Buk heals cuts, burns, bruises, cold sores, frost bites, chilblains, dandruff, eczema, poison, chapped hands, cracked feet, and all skin diseases and injuries. It is a sure cure for all the above and cures, 25c box. At all druggists and stores, 25c box.

ZAM-BUK GIVES QUICK RELIEF

Plowing and Shelling.—A letter from France says: "There is a most terrific light going on on our right. The roaring is continuous and terrible. We—i.e., our battalion—are not in it at present, but may have to join in at any moment. We have done a fair amount of shelling since we have been here and the Germans have suffered as they deserve to."

"The destruction is too awful for words. All round villages and towns are laid flat. What has become of the wretched inhabitants. God knows! A few stragglers are rapidly disappearing. I am all round the line. They live in the cellars, I suppose. Some few go on plowing with shells flying over their heads; they take their chance."

The recently bookmarked Durazzo is a part that has played a prominent part in both ancient and modern warfare. The Greek city of Epidauria, as it was at the time of the struggles leading to the Peloponnesian War, was much harassed by the Athenians. The city was called Dyrachium, whence the modern name is derived, and it became the principal landing place for the route from Brindisi to Greece.

A great military road to the Hellespont began here. The town is memorable also for the battles between Caesar and Pompey and, later, because the capital of a Byzantine province.

Protection of Wild Life

Some Measures Essential to the Conservation of Canada's Wild Birds

If the wild life of Canada is to receive proper protection, it is essential that several important steps be taken with the least possible delay. The following measures are not mentioned in the order of their relative importance, for each of them is essential to a complete system of protection and merits the wholehearted advocacy of every public-spirited citizen.

(1) Careful revision of the provincial acts governing the protection of insectivorous birds, to ensure that no valuable species are included on the "black list."

(2) Negotiation of a migratory bird treaty between Canada and the United States.

(3) The selection of suitable areas throughout Canada, and their erection as bird sanctuaries.

(4) Adequate protection for the sea birds of the Atlantic coast.

(5) Close restriction and, where feasible, total prohibition of the sale of game.

(6) Thorough revision of the Northwest Game Act and provision for its strict enforcement.

(7) Organization of strong, independent societies to create a public opinion of sufficient strength to obtain and enforce proper protective laws.

NEIL PERGUSON.

Marion Bridge, C.B., May 30, '02. I have handled MRS. JAMES LAMBERT during the past year. It is always the first Liniment asked for, and unquestionably the best seller of all the different kinds of Liniment I handle.

Carl Maria von Weber, the celebrated composer, wrote a piano piece which a friend pronounced unplayable, as one chord had a note in the centre which could not be reached by either hand. "Can you do it?" answered the composer, and he struck the note with his nose.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

"Willie, you haven't said whether you thanked Mr. Carr for taking you out for a ride."
"Yes, mother, I thanked him, but I didn't tell you, because he said, 'Don't mention it.'"

Hardening of the Arteries

An Interesting Explanation of How This Dreaded Condition is Brought About.

You take out the garden hose in the spring, turn on the water, and if the rubber has got hard and brittle the tubing bursts and water spurts out in all directions.

The arteries of the human body may be likened to small rubber pipes, which go everywhere through the body and carry blood to the hands and feet, as well as to the nerves, muscles and vital organs.

If this blood is burdened with the poisons left over when the liver and kidneys are not properly performing their filtering work, these poisons form a deposit on the inside walls of the arteries.

The deposit thus formed gradually thickens and hardens the walls of the arteries. The tiny blood vessels of the liver are affected, and thence comes that fatal disease—cirrhosis of the liver. The cells of the kidneys become starved for want of blood, and Bright's disease gets its start.

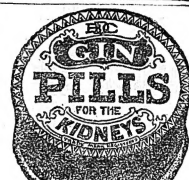

In health the arteries have the elasticity of rubber, and expand, contract or elongate, as required by the demands of the blood pressure. Hardened, the arteries are like so much brittle rubber tubing. The blood pressure comes on, the tubing bursts, and the resulting blood clot on the brain causes apoplexy.

It will be plainly seen that the cause of trouble is in the inefficient condition of the liver and kidneys. When these filtering organs are kept healthy and active, and the bowels regular in the removal of waste matter, there is no chance for such dreadful conditions as hardening of the arteries bring about.

As in all forms of serious disease, prevention is the only wise course to follow. You can positively depend on Dr. Chase's Kidney-Liver Pills to awaken the action of liver and kidneys, and also ensure the regularity of movement of the bowels. It is only by the activity of these organs that the blood can be kept pure and free from toxic acid and other substances which form deposits in the arteries at other points in the human system, causing pain, suffering and serious disease.

When you think of the scores of common ills, such as colds, indigestion, biliousness, headaches, backaches, etc., which arise from a torpid condition of these organs, you will better understand the reason why Dr. Chase's Kidney-Liver Pills are the favorite family medicine in many thousands of homes. By keeping the liver, kidneys and bowels active they cure the common ills of life and prevent serious disease. One pill a dose, 25c each box, all dealers, or Educational, Bates & Co., Ltd., Toronto.

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

Stop Backaches

Don't complain about pains in your back when the remedy lies right to hand. Use Gin Pills backaches, and they do it in an easy way by going right to the root of the trouble.

Gin Pills FOR THE KIDNEYS

Gin Pills act on the kidneys and the bladder. They soothe and heal the inflamed organs, which are causing the suffering. Suffer your kidneys and bladder, hands and feet, wrists and ankles, are likely to follow. A dose of Gin Pills is sure to save a world of pain.

You will realize their value when you read what Mrs. J. T. Wedge, of Summerside, P.E.I., writes:

"Gin Pills are the greatest of all kidney remedies and a medicine which is at present doing me a world of good. They are worth their weight in gold to any sufferer."

Get GIN PILLS today at your dealer's. A box, 25c, or 6 boxes for \$2.50. Trial money REFUND if you write.

National Drug & Chemical Co. of Canada, Limited, Toronto

TYPHOID

is no more necessary than Smallpox. Any experience has demonstrated that typhoid is a vaccineable disease, and that the vaccine is a powerful remedy for the disease. It is a more vital than any other vaccine. Ask your physician, druggist, or read for "Have you had Typhoid?" bottles of Typhoid Vaccine, produced by the National Drug & Chemical Co., Ltd., Toronto.

Sir E. Grey's Advice
Sir Edward Grey, in the British House of Commons, has been deprecating the publication in English journals of articles and cartoons calculated to be offensive to rulers or people of neutral nations. Sir Edward's position is a sound one, but his taking it may have little effect. How is a small minded person to show that he is a patriot, if he cannot insult a foreigner?—Montreal Gazette.

Chinook Breezes

Bills are out for an Easter dance, Tuesday, April 25th.

Special Easter music at the Chinook Church on Sunday evening next.

J. W. Lawrence, accompanied by his sister, returned to Chinook on Tuesday morning, from Ont.

Some 50,000 bushels of wheat is stored in the new farmers bin, at Chinook, 90 per cent. of which grades a good No. 1.

A bad runaway took place at Stanmore last week, when a team from Youngstown became frightened. They ended their wild run at this creek. One of the horses was drowned. Both of occupants of the carriage escaped injury.

'Censored!'

Several letters arriving at the Chinook post office have been "Censored" by the Government, particularly those coming in from the U. S. One indignant lady, whose letter had been opened at Calgary, "went for" the postal authorities at Chinook for daring to open her letter. The local post office has nothing whatever to do with the "Censoring." It is simply a government precaution, which has been made a necessity.

DENTISTRY

DR. PIPER will be in Chinook in May, from the 10th to the 19th, inclusive.

LOST

Big White Sow, weight about 300 lbs., hair all white, but across her hips skin is black. \$5.00 reward for information leading to her recovery. She left L. B. Butt's on Saturday, March 18th.

Judicial Sale

PURSUANT to the Judgment and Final Order for Sale in an action in the Supreme Court of Alberta, Judicial District of Calgary, there will be offered for Public Auction

AT CEREAL

in the Province of Alberta, On Saturday, the 29th day of April, A.D. 1916

by E. C. Martindale, Youngstown, Alberta, at the hour of 11 o'clock in the forenoon, the following Lands and Premises, namely:

Lot 2, Block 4, Cereal, Alberta, being part of an unregistered subdivision of the South-West Quarter of Section 28, Range 6, West of the 4th Meridian, Plan 2686-B.C., Cereal

The plaintiff is informed that the said property consists of one lot upon which there is conducted a confectionery store, restaurant, bakery and sleeping rooms. The building is in good repair having been erected about two years ago.

The said property is well situated in the said town and well adapted to the business at present being carried on.

The terms of sale are 10 per cent. of the purchase price must be paid at date of sale. The plaintiff or its Solicitors and the balance as follows: 15 per cent. within Three (3) months from the date of the sale and the balance in Three (3) equal instalments at the expiration of 6, 9 and 12 months respectively, from the date of sale. All deferred payments bear interest at the rate of 8 per cent. per annum. In other respects the terms and conditions of the sale are the standing conditions of the Supreme Court of Alberta.

Further particulars may be had from Messrs. Clarke, Carson, MacLeod & Company,

Solicitors for the Plaintiff, at their office in the Canada Life Building, Calgary, Alberta.

LAURENCE J. CLARKE, Clerk of the Court
Approved: "L. F. CLARRY" M.C.
